NEW

Helena

Helena is a colour that offers great richness with the perfect balance of grey and white tones and delicate distress. In this way, the depth of onyx – the natural stone that inspired this piece – can shine through. The ideal colour for luxury spaces, its design is appreciated by designers and architects alike thanks to its beauty and lustre.

Laurent

Inspired by the natural Port Laurent stone, we've crafted a unique colour that stands out due to its complex beauty. Its texture brings into play shades and tones that enhance one another by contrast. The gold grain predominates the surface and lends warmth to a cold background of dark tones, ideal for the most luxury spaces.

DEKTON® SL | M

designed by COSENTINO

The thinnest X-Gloss surface. The widest possibilities.

Dekton X-Gloss is the most ultra-thin surface on the market. Simply revolutionary.

NEW X-Gloss Finish

Introducing Dekton X-Gloss Slim: A large format surface with an ultra-thin 4-mm thickness that offers unlimited design options.

Its lightness and reduced thickness make it the most durable, high-performance surface for bathroom and kitchen cladding, as well as for all types of furniture (doors, drawers, etc.)

Dekton X-Gloss

Dekton Slim with our X-Gloss finish is the thinnest and most lightweight polished material available on the market. It boasts highly technical features making it very resistant, yet also lightweight, very easy to handle and install, and perfect for both inside and outside spaces.

Mirror Effect

Cosentino's vast experience and expertise in treating and polishing natural stone over generations has enabled us to create a completely smooth surface with an almost entirely clear reflection.

Damp-proof Surface

It is highly resistant to stubborn stains, thanks to our X-Gloss nanotechnology that is unique to the market, and also boasts water-repellent properties.

Slim Thickness **Huge Format & Performance**

Kerso - STONIKA Collection

What is Dekton®?

Dekton® is a sophisticated mixture of more than 20 minerals extracted from nature. Its production process is the result of years of learning and inspiration to make glass, latest-generation porcelain tiles and quartz surfaces.

Dekton® uses in its manufacturing the exclusive TSP technology, able to sinter mineral particles making them bond with each other, change and compact their internal structure. A unique and innovative technological process that represents an accelerated version of the metamorphic changes that natural stone undergoes when exposed for millennia to high pressure and high temperature.

Dekton® emulates in a few hours what takes nature thousands of years, through an exclusive technological process.

The electron microscopy allows the reduced porosity of the material, due to the sintering process and exclusive ultra-compaction of Dekton®. It's virtual zero porosity and the non-existence of the microflaws that cause tension and weaknesses set Dekton apart from other materials.

Dekton® features

Large Format

Thanks to the size (up to 3200x1440mm)* and the lightness of Dekton® (from 4 mm thick), the design possibilities for your kitchen, bathroom, façade, walls or high transit floors are growing exponentially.

Slab Format

up to 3200x1440mm

Available thicknesses

4, 8, 12, 20 and 30 mm

It resists everything

Extremely resistant to scratching, virtually zero porosity and highly resistant to aggressive chemical products used in kitchens and bathrooms.

Relentless in heat

Extreme resistance to high temperatures, cookware fresh off the hotplate and UV rays.

Unlimited inspiration

Design your modern kitchen with eye-catching colours and unique textures. Large format for new compositional solutions.

A worktop to be enjoyed

Easy maintenance, no traces of fingerprints or marks and maximum durability. Your Dekton worktop is guaranteed for 25 years.

Kreta - INDUSTRIAL Collection

* 4mm thickness only suitable for cladding

* Check availability of 3cm thickness.

Dekton® Advantages

Highly UV Resistant

Scratch Resistant

Resistant to Stains

Maximum Resistance to Fire and Heat

Resistant to Abrasion

Resistance to Freezing and Thawing

Superior Mechanical Resistance

Low Water Absorption

Dimensional Stability

Fireproof Material

High Resistance to Hydrolysis

Dekton® XGloss Advantages

Crystalline Shine

Water Repellent

Kitchen worktops

Dekton® is a long-term product for those looking to turn their kitchen into a unique space. Firstly, because it allows you to have installation in one piece with fewer cuts and joints, no limits just the appeal of a completely uniform surface, which fits seamlessly into very different design styles.

Sogne - STONIKA

Portum - NATURAL Collection

Dekton® combines the qualities desired by the chef in all of us. It is a clean surface that is nice to touch and resistant to the daily grind that takes place in a kitchen over years of use. An ultra-sophisticated material for busy everyday life, capable of creating spaces that make the preparing of food, day after day, a pleasant experience that precedes the pleasure of sharing a meal with friends or family.

It represents beauty and solidity with easy, fuss-free cleaning. The structural density of Dekton® is a breakthrough in engineering, but what really matters is that we do not have to worry about scratches, stains or traces of heat. A simple wipe with a cloth and presto, because the kitchen should be enjoyed with no restrictions, this is the Dekton® way of thinking.

Optimma

New optimized Dekton® format.

The ultimate interior cladding solution.

The Dekton® slab has been optimized with its most common applications in mind to create a new format with improved cost, design, installation and handling. Introducing our first Optimma family format specifically for cladding:

Optimma format 260 x 100 x 0.4 cm.

260x 100 cm in 4 mm thickness

The slabs are created in 4mm thickness, which gives it a lightness that allows easy handling, and in case of need, it can be easily cut to adapt the product to all spaces.

Cost Efficiency

The sizes were optimized to the most common coating standards, this allows us to avoid waste, which in turn reduces price.

Design with Purpose

The board has been created to take advantage of its total height, which makes it much easier to cut it for cladding.

Easy to Install

The product is smaller and lighter, which makes it easier to use transport and handling. Cutting can be done with simple tools. The edges are already bevelled and the piece is always meshed.

Design Match

The design has been conceived to place the boards vertically to create a continuous design.

Bathroom wall coverings and worktops

**Minimum maintenance.
Great beauty and resistance.**

The bathroom is the space in the home, where hygiene and harmony need to express themselves in the best possible way. A peaceful environment devoted to personal care and hygiene - a space to relax and unwind free of any worries.

Dekton®, thanks to its low porosity, is completely waterproof against liquids. Water glides smoothly over the surface without ever penetrating. This, along with unchanging beauty, results in extremely easy cleaning.

Their textures and colours are an endless source of inspiration for the design of water-related areas, we're talking about Dekton®, its possibilities are endless.

DEKTON® SLIM

designed by COSENTINO

Bathroom coating Dekton Slim 4mm

**Maximum resistance against humidity
with the minimum number of joints**

Dekton® Slim is the ultra resistant to moisture and stains ideal for bathrooms. A high performance product that requires no maintenance other than a simple wet cloth.

Its large format of up to 3200 x 1440 mm covers large surfaces avoiding the maximum number of joints and therefore, dirt.

Outdoor kitchen covering

Cook with the sky as a roof

Cooking is definitely a pleasurable experience and doing it outdoors, usually results in a small social event. Everyday celebrations that we can enjoy with company around a grill. Dekton®, due to its ultra-compact structure, is particularly suitable for installations for outdoor kitchens and barbecues..

Dekton® provides strength and style to these spaces, it gives them an undeniable personality and unlimited practicality. Stains, bumps, utensils at high temperature... Dekton® will resist the demanding use over time while maintaining its unchanging beauty

It is not affected by ice, sun, sleet, or wind either. When bad weather arrives, Dekton® simply needs an effortless, fuss-free cleaning so that it can showcase its best again.

DEKTON® SLIM
designed by COSENTINO

Furniture cover Dekton Slim

**Turn the furniture of your home into
surfaces of great beauty and strength
with Dekton Slim 4mm**

Dekton® Slim allows you to give furniture never seen before benefits: tables that resist everything, doors that do not scratch or stain ...

The design possibilities are unlimited thanks to its custom cut and easy installation.

Check availability of Dekton® Slim colours.
Dekton® Slim is not suitable for kitchen
countertops cladding.

Dekton® Warranty

Dekton® is the only brand that offers a certified warranty. In writing. Only a global leader, due to the company's position as the largest producer of quartz surfaces could once again draw ahead of the pack and offer a real 25-year warranty for Dekton®.

Dekton® presents its 25-year warranty. A guarantee to give consumers more confidence. Once again Dekton® proceeds to innovate. The guarantee of the leader. We shall now indicate the steps to follow and the requisites for fulfilment of the Dekton® warranty.

Warranty terms and conditions:

25-year Warranty for Dekton® products installed by a workshop or stone mason:

1. For the warranty to take effect, the user must produce proof of purchase.
2. The warranty does not cover defects deriving from manufacturing or installing the product, as such operations are not performed by Cosentino.

Certificates

Dekton® is internationally certified to ensure maximum safety and protection.

NSF

Certification that substantiates that the product is safe for the health in hygienic terms.

Greenguard

Certification that substantiates the low emissions of chemical compounds.

ETE

Dekton® by Cosentino has been assessed by the ITeC (Instituto de Tecnología de la Construcción de Cataluña) as a product for ventilated façades.

ISO 14001

Accredits the efficiency in the use of water systems and the control of environmental risks.

Neutralidad en carbono: Desarrollo sostenible

Grupo Cosentino entiende el desarrollo sostenible como un compromiso esencial en su estrategia de crecimiento, vinculada con el respeto y la protección del medio ambiente.

We address aspects related to the efficient use of natural resources, proper waste management, atmospheric emissions, discharges and other potential impacts in order to make sustainable use of natural resources and protect biodiversity and ecosystems. At Cosentino we

are strongly committed to the 2030 Agenda promoted by the United Nations and the Local Action Plan promoted by the Spanish Government. As a demonstration of our commitment, we have managed to offset the 42,532 tonnes of CO₂ emissions resulting from one year of

Dekton® production, thus obtaining the Zero Carbon Footprint label for the entire product life cycle in 2019 for all Dekton® brand products. In addition, the Sunlit Days series by Silestone® is the brand's first collection to achieve this certification.

We reduce our impact

We are committed to energy efficiency, emissions reduction and sustainable mobility to minimise our impact.

- **Energy efficiency:** it is a priority objective for Cosentino to reduce energy consumption in the production process and in the general group activity, which is why we have managed to obtain 100% of the electricity we use from renewable sources.
- **Emission reduction:** 2.8 million euros have been invested in the implementation of an energy management and monitoring system for the heat systems, which allows heat from the Dekton® furnaces to be recovered and used in the dryers, thus reducing emissions.

Sustainable mobility: we have recently joined the 'Plan Sumamos Salud + Economía' under which we have a Mobility Policy that helped us to avoid 230 TCO₂ in 2018.

We calculate our carbon footprint

It is an external body that verifies the calculation and the results of the carbon footprint that are submitted to the Spanish Ministry for Ecological Transition and Demographic Challenge (MITECO, in Spanish), which is responsible for approving and registering our Footprint, becoming part of the '**Spanish registry of carbon footprint, offsetting and carbon dioxide absorption projects**' of the Spanish Climate Change Office (OECC, in Spanish), whose results are made public as an exercise in transparency.

This calculation uses energy and/or fuel consumption data, as well as raw material consumption data collected from all **Group subsidiaries** (Centres, Workshops, Cities, HUBs, HQ, etc.) with a view to offset these emissions.

We offset our emissions

To achieve carbon neutrality in Dekton®, at Cosentino **we offset our emissions over the entire product life cycle** (scopes 1+2+3) by investing in GHG emission reduction projects.

For this purpose, we identify those projects that meet the requirements for responsible offsetting and that, in turn, have a strong social dimension that contribute to the achievement of the **Sustainable Development Goals of the UN's 2030 Agenda**.

The project selected to offset the 42,532 tonnes of CO₂ emissions, resulting from one year of Dekton® production, has a direct impact on sustainable development by **supporting the local economy, providing training and job opportunities**.
