LONGEVITY & SUSTAINABILITY

We believe that premium quality and sustainability go hand in hand.

At Fritz Hansen, we are working with social, environmental and economic considerations to find sustainable solutions, without compromising on quality.

From careful sourcing to operating our own factory on green electricity, we believe the details matter - in design and process.

LIFELONG LOVE AFFAIR

Do natural imperfections make great designs more beautiful?

Opinions of beauty are linked to people's deepest desires and inherent values, which is perhaps why they can often seem so strong and visceral. That, too, is simply natural. Attitudes towards the natural wear of materials differ too. Patina and the natural beauty marks displayed over time on materials such as metal, stone and leather are admired by some and disliked by others.

In some cases, vintage furniture designs with patina are prized by collectors for their uniqueness. The visible age of a given piece becomes a source of pride; its changes are natural and poetic reminder that nature is mutable. On the other hand, the desire for consistency is natural too, and linked to peace of mind. Some prefer slower change and less sensitivity from the space around them, favouring an evergreen look with materials that have been coloured and treated to stay relatively consistent over time.

The beauty of objects is how different they are from us, how they stand still and steady in the everchanging world. Differences of opinion and in preference are, after all, only natural.

CLASSIC DESIGN

A Danish design bridges Chinese antiquity
and new Nordic taste.

The China Chair™ was designed by Hans J. Wegner in 1944. Inspired by the timeless aesthetic of ancient Chinese design in the 17th and 18th centuries, the China Chair epitomises his lifelong quest to understand the nature of wood and explore its possibilities. In this modern interpretation, he unfolded his talent as a wood craftsman and his flair for expressive and sculptural functionalism.

SIMPLE ELEGANCE

Poul Kjærholm & Fritz Hansen

A trained cabinetmaker who completed his studies at the Danish School of Arts and Crafts, Poul Kjærholm had a particular interest in construction materials – especially steel, which he considered a material deserving the artistic respect that was commonly awarded to wood.

Poul Kjærholm initiated a collaboration with furniture manufacturer Ejvind Kold Christensen in 1955, which continued for the rest of Kjærholm's life with the two families remaining close to this day.

Two years after the designer's death, the Kjærholm trustees entrusted Fritz Hansen with the production and sales of The Kjærholm Collection – designs developed by Poul Kjærholm from 1951 to 1980.

Fritz Hansen is honoured to continue production and to distribute Poul Kjærholm's furniture to architects and private customers around the world.

TRANSPARENT DESIGN

For Poul Kjærholm, simplicity was essential. He insisted on materials of the highest quality and designed for transparency. Indeed, nothing in Kjærholm's designs is unnecessary or cosmetic.

ADMIRING ARNE JACOBSEN

Why the Italian editor, gallerist and businesswoman
Carla Sozzani collects Arne Jacobsen design.

Carla Sozzani is well known as the founder of 10 Corso Como, the Milanese concept store – and quite possibly the first of its kind in the world – which she founded in 1991. She is also a gallerist and editor, having worked with the likes of Bruce Weber and Herb Ritts and collaborated with Azzedine Alaïa and Rei Kawakubo. She has curated exhibitions with Annie Leibovitz, Helmut Newton, David La Chapelle and Steven Meisel in her own gallery and at the Maison Européenne de la Photographie in Paris, among other locations. What many don't know is that Sozzani is also a long-time admirer and collector of Danish design.

Her fascination with Arne Jacobsen's work began in the '70s and has continued for almost 50 years. Today, Arne Jacobsen chairs can be found at 10 Corso Como, Sozzani's studio, and in her home.

'Harmony is the secret of any environment, and it only develops over time. For me it is like this: I can add more and more Eggs, Swans, Drops or Series 7 to my interiors, while at the same time they appear as if they were there for the first time or always. You see?' she says.

The organic shape of Arne Jacobsen designs captivates Sozzani, who describes the Series 7 chair as 'sensual.' The design, she explains, is so organic that it is almost like a human form. You can dress it up in any colour and it takes on a new attitude.

Sozzani pulls out her iPhone to share photographs of pieces from her personal collection, and a rare, vintage Jacobsen design that she is currently hunting for.

*Carla Sozzani has collaborated with Fritz Hansen on a new palette of 16 colours for iconic Arne Jacobsen designs, released in 2020.

THE REBELLIOUS ARNE JACOBSEN

Arne Jacobsen & Fritz Hansen

It is said that as a child growing up in Copenhagen, Arne Jacobsen painted over the Victorian wallpaper in his bedroom. But young Arne did not cover his walls with typical childish drawings or paint the ornate wallpaper boyish blue. Instead, he decided to paint his room entirely white.

His decision may seem commonplace today, but in the early twentieth century white walls were not yet in fashion. From the very beginning, Arne Jacobsen was ahead of his time.

For more than half of the twentieth century, Arne Jacobsen's ideas shaped the landscape of Danish design, rippling out from Scandinavia to influence architects and designers around the world. He directed projects ranging from complex buildings like Denmark's National Bank to meticulous challenges as humble as a special teaspoon for his cutlery set, working with a relatively small studio staff driven by an unquenchable desire to create.

Jacobsen's creative process centred on his strict consideration of detail. He brought his visions to life for patrons and builders with scrupulous, hand-painted watercolour sketches. In any given year, Jacobsen managed to design what others might be happy to produce in five.

Crafted in mouth blown glass and brass, the Clam™ pendant designed by Ahm & Lund is a modern lighting innovation with a timeless aesthetic.

Mouth blown opal glass and brushed brass come together – and move apart – to create elegant, adjustable and atmospheric lighting for dining and

living spaces. Equally elegant open as it is closed, the perfectly balanced design elevates any room with its considered combination of form and ambience.

WHAT DEFINES GOOD DESIGN?

‘Good design is primarily design that lasts. Design must have something to say; it must be able to improve our quality of life and be meaningful. But for me, design is not just about function – it’s also about feelings, and I like if it provokes a little and can challenge our way of life.’

WHAT MAKES A SPACE FEEL LIKE HOME?

‘A room is homey when the lighting and the atmosphere come together; when the music matches the place, and when the combination of colours and light makes me feel happy. I also like to be able to feel what is happening outside. I don’t like being in pent up spaces, where daylight is excluded or where materials and furniture are cold, or where I get cold feet.’

PLANNER™ DESIGNS

Paul McCobb's innate understanding of perspective paved the way for a career as one of the most important design figures of his time. The self-taught designer's pragmatic yet perfectionist nature was reflected in his work, characterised by slender, graphic lines, a simplicity of form and lightness of design.

A PROFOUND SENSE OF DETAILS

Cecilie Manz's universe revolves around her love of art, and the names of her products often pay tribute to her favourite creative minds.

Cecilie Manz

Over the course of her career, Danish designer Cecilie Manz has shown an impeccable ability to create lamps, ceramics, home accessories and furniture design that continually unite the Scandinavian tradition of simplicity with a modern, international expression.

While her work tends to abide by the 'form follows function' philosophy, each design is also imbued with a serene beauty. Pieces are understated yet present themselves to the world with an artistic twist.

INSPIRED BY IKEBANA

‘Ikebana is often translated to Japanese floral art or flower arrangement,’ says Tomoko Sempo Yanagi, an Ikebana professor and the chairperson of Ikenobo UK & Ireland, ‘But, in my view, Ikebana isn’t just an artistic arrangement of flowers and plants, the practice is as spiritual as it is technical.’

Ikebana vases by Jaime Hayon come in three variants.

Ikebana Small vase designed by Jaime Hayon.

Dating back to the seventh century when Buddhists started offering flowers at temple altars, ikebana was later formalised in the 16th century by emperors and aristocrats. The practice also has roots in the ancient Shinto religion – a belief system that conceives ‘god,’ or ‘spirits,’ as residing in natural phenomena such as trees, flowers and wind. Today, the art form is practiced by professionals and amateurs alike.

At its core, ikebana involves carefully selecting plants and flowers to create a form that honours natural characteristics when placed in a new environment.

Ikebana and Ikeru vases by Spanish designer Jamie Hayon are created in the spirit of the practice and its meditation on nature. The modern vases are designed to honour every flower placed within them, from stem to crown.
