Explore a world of inspiring design, craftsmanship and beauty. Here, you'll find more than 150 years of Danish design tradition and collaborations with visionary architects, designers and artists from around the world.

# Intentional design

The environments that surround us impact the way we engage, work and feel. Whether at the office, at home or in public spaces, intentional design can enhance creativity, support productivity, and aid learning. It can inspire, uplift and comfort us, which in turn affects our wellbeing and ability to innovate.

That is why at Fritz Hansen we don't simply make furniture; we create spaces. Whether in an office, hotel lobby or restaurant, our aim is to connect architecture and design as a whole. The way that objects, lighting and technology sit amid their wider context shapes our mood and motivation, which is why we work closely with clients to create customised spaces that suit organisational cultures and purposes.

As the world has changed over the past 150 years, we have evolved with it. We have retained our founding purpose as a maker of beautiful, functional and long-lasting furniture that enhances spaces and the wellbeing of those within.

Radisson Collection Royal Hotel (SAS Royal Hotel), Room 606 (Denmark)

# Caring for the world

At Fritz Hansen, we believe that true sustainability lies in quality and longevity - well-crafted pieces that endure for generations. We are committed to continually reducing our negative impact on people and the planet, without compromising the craftsmanship and timeless design that have defined us for over 150 years.

Fritz Hansen is committed to the 2015 Paris Agreement pursuing efforts to limit warming to 1.5°C above pre-industrial levels. We work with the Science Based Targets initiative to help us set emission reduction targets in line with climate science and Paris Agreement goals.

Additionally, Fritz Hansen is prioritising the use of certified materials, partnering with organisations like FSC™, PEFC, OEKO-TEX®, GREENGUARD Gold, and EU Ecolabel to ensure responsible material sourcing. Since 2021, carbon footprint calculations for all products have been available for commercial customers, thus enabling clients to make informed choices aligned with their sustainability values.

# Climate goals

By collaborating with designers, partners and suppliers who share our values, we combine our expertise with specialist knowledge to bring about positive and responsible changes.

## CLIMATE GOALS 'TOP 5'

### 1. 38% CO<sub>2</sub>e reduction by 2026

Fritz Hansen commits to reducing scope 1 and scope 2 GHG emissions by 38% by 2026 from a 2021 base year and to measuring and reducing its scope 3 emissions. As of 2024, we are on track to reaching that goal. The Science Based Targets initiative approved this target using a streamlined target validation route exclusive to small and medium-sized enterprises.

### 2. Water-based lacquer for Arne Jacobsen shell chairs starting 2025

Fritz Hansen is set to replace all non-water-based lacquer for the more climate friendly water-based type beginning in 2025 for use on our most-sold iconic chair range. Switching to water-based lacquer will contribute significantly to the reduction of our climate impact.

### 3. 80% EU-Ecolabel by 2030

Fritz Hansen is committed to ensuring 80% of our products are certified as EU Ecolabel by 2030. We are working on several initiatives to reach our goal including using more EU Ecolabel-textiles.

### 4. 100% certified wood by 2025

Fritz Hansen aim for 100% certified wood (FSC™ or PEFC) by 2025. Currently we aim at 95%. All Arne Jacobsen stacking chairs are PEFC certified and all of the teak furniture in our outdoor collection is FSC™-certified.

### 5. Eliminate all hazardous substances by 2030

Fritz Hansen is committed to eliminating all hazardous substances in our manufacturing by 2030. All substances currently in use are applied in a complaint manner as we transition to more climate friendly alternatives.

## Materials and manufacturing

Since 1872 Fritz Hansen has crafted original and enduring designs made to last for generations. Material quality is essential to ensuring iconic design ages with grace and beauty. Strength, durability, and design consideration go into every material type and colour used in the production.

## WOOD

We prefer to use certified wood in our products (FSC™ or PEFC). This is our guarantee that no more trees are felled than the forest can reproduce. Certified wood also ensures that that local communities, biodiversity and forest workers are treated with respect.

We aim for 100% certified wood (FSC™ or PEFC) by 2025. At the end of 2024 we were at 95%. All our Arne Jacobsen shell chairs are PEFC-certified. 100% of teak furniture in our outdoor collection is FSC-certified.

## TEXTILES

We know the carbon footprint of our textiles and can advise customers on what textiles to choose to reduce the environmental impact of a product. We prefer to use textiles with EU Ecolabel, GREENGUARD Gold and OEKO-TEX® STANDARD 100 certification.

## LEATHER

Leather is a precious natural material that can last for decades while growing more beautiful as it ages. Fritz Hansen offers a selection of extremely high-quality leather types to give furniture the perfect fit, look, and qualities required for the individual home or workplace. All our leather is from European cattle as by-products of the meat industry, ensuring that no cattle are raised or slaughtered solely for their hides. Fritz Hansen offers highest-quality Aniline, Semi-Aniline and Protected leather types.

## METALS

Metal is a key material used in the production of many of our most iconic furniture designs. Metals are selected for their strength, durability, aesthetic appeal and ability to meet the specific needs of our designs. We source metals such as stainless steel, steel, and aluminium from trusted suppliers who meet our quality standards.

The aluminium we use is up to 100% recycled. Our suppliers prioritise using the highest amount of recycled aluminium where possible.

Scrap metal from the production process, including stainless steel, chromed steel, and aluminium, is sold to scrap dealers and melted down for recycling.

# ReNEW

HISTORY INCLUDED

Fritz Hansen's ReNEW is a set of initiatives designed to advance a circular economy, and ensure our products remain in use for as long as possible.

# A legacy of quality & longevity

Introducing our Refurbish, Recrafted and Repair programmes available for commercial customers, thus enabling clients to make informed choices aligned with their sustainability values.

## REFURBISH SERVICE Restore your chairs (Europe)

Restore existing shell chairs to good-as-new condition. Refurbish is Fritz Hansen's certified refurbishment programme that breathes new life into original Fritz Hansen Ant™, Grand Prix™, and Series 7™ shell chairs.

## RECREATED PRODUCTS Buy restored chairs (Global)

Buy restored Fritz Hansen shell chairs with a previous life included. Recrafted offers certified restored original Fritz Hansen Ant™, Grand Prix™, and Series 7™ shell chairs ready for their next life.

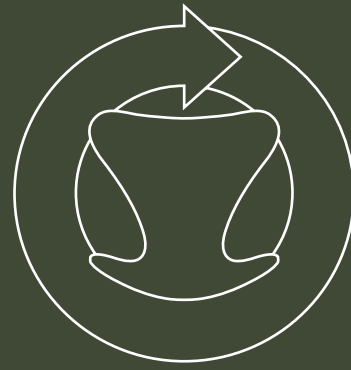

## REPAIR SERVICE Keep products in use (Global)

Keep existing products in use with spare parts. Repair offers spare parts to repair Ant™, Grand Prix™, Lily™ and Series 7™ chairs dating from 1968 and spare parts for the Egg™ and Swan™ lounge chairs dating from 1975.

# Refurbish

Restore your chairs (Europe)

Refurbish is Fritz Hansen's certified refurbishment programme that aims at reducing waste and climate impact for commercial client projects.

Refurbish breathes new life into original Fritz Hansen Ant™, Grand Prix™ and Series 7™ shell chairs in a programme that's better for the environment and better for business.

- As the manufacturer of Arne Jacobsen's shell chairs since their introduction to the market in 1952, we have expertise in handling renovations in the most environmentally friendly way.
- The Refurbish service involves updating and enhancing used Fritz Hansen products to improve their appearance and functionality, extending their lifespan.
- Fritz Hansen only uses original spare parts and original lacquers.
- Fritz Hansen provides CO<sub>2</sub>eq documentation of Refurbished chairs.
- All refurbished chairs will have a renewed 10-year warranty.

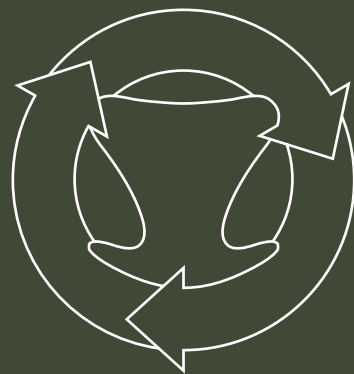

# Recrafted

## Buy restored chairs (Global)

Chairs in the Recrafted programme undergo a thorough refurbishment process. This process may include cleaning, repairing and refinishing the furniture to restore its functionality and aesthetic appeal. Each piece is carefully inspected to ensure it meets quality criteria before being made available for sale.

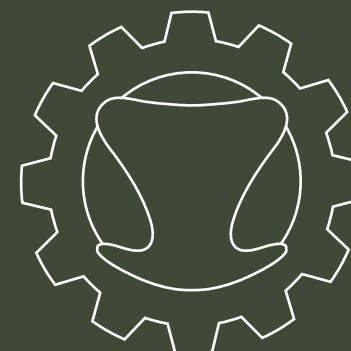

Recrafted facilitates companies seeking to meet environmental regulations with a lower carbon footprint offering.

- Fritz Hansen provides documentation of CO<sub>2</sub>eq for all Recrafted chairs.
- Fritz Hansen only uses original spare parts and original lacquers for refurbishing used chairs.
- All Recrafted chairs will have a renewed 10-year warranty.

### TRADE-IN

Recrafted also offers commercial clients with original Fritz Hansen furniture the opportunity to sell back to Fritz Hansen. When selling back existing chairs, clients must buy new or Recrafted chairs.

# Repair

## Keep products in use (Global)

The Repair programme helps ensure our pieces stay in circulation for generations to come. We offer spare parts and repair services for much of the indoor and outdoor collection, including Arne Jacobsen stacking chairs dating back to 1968, as well as essential components for the Egg™ and Swan™ chairs from 1975.

LYNGBY, DENMARK

## Refurbishment of Series 7™ chairs

The revitalised canteen space at Topsoe's headquarters not only offers employees an enjoyable, multifunctional environment but also supports Topsoe's sustainability focus thanks to Fritz Hansen's Refurbish programme.

As a global leader in carbon emission reduction technologies, sustainability is at the heart of Topsoe. It made sense, then, to look at how the Topsoe could implement sustainability on a practical level during the refurbishment of the outdated canteen at their headquarters in Lyngby, north of Copenhagen.

"The canteen is the hub of the building and was historically used only during lunch hours. We wanted to develop the space so people would use it more often, implementing a designated café for connection and a more friendly and appealing environment for informal meetings throughout the working day," explains René Jacobsen, Global Facility Management Director at Topsoe.

Together with Helle Nøhr Holmstrøm, an architect specialised in workplace design, culture and human behaviour at the facility management company Coor, they worked to create a more dynamic environment conducive to collaboration and connectivity at all levels of the company.

And with 900 people using the canteen on a daily basis, it was important to balance sustainability practices with financial considerations.

“Repurposing furniture is on the rise and architects and designers have long been aware of the value in salvaging quality furniture to prevent waste and maximise resources,” notes Helle. “This approach aligns with sustainability goals and also offers financial benefits, as continual office redesigns are neither practical nor sustainable.”

“There’s a sense of emotional attachment to the chairs from 1983. They are a part of Topsoe’s history. Furniture has the ability to create meaningful connections.”

HELLE NØHR HOLMSTRØM

They discovered a number of Series 7™ chairs that have followed the company since 1983 but had been sitting in storage for years. Already familiar with Fritz Hansen’s Refurbish programme, they knew it was possible to give these old designs a second life.complement the biophilic design and sustainable mindset underlying the project.

## Carbon footprint

In the interest of understanding environmental impact, we deliver a carbon footprint product impact calculation for commercial client projects. A carbon footprint measures the total greenhouse gas equivalent (CO<sub>2</sub>eq) produced over a product's life cycle. Every product's carbon footprint depends on the materials, production, shipping, use, and disposal.

# Carbon footprint results and usage

Our calculations are based on the EU Product Environmental Footprint (PEF) methodology making our calculations comparable with other design brands. We actively strive to reduce the carbon footprint of our existing portfolio and minimising it in all future designs.

EXPLORE MORE  
CALCULATIONS

## TOTAL ESTIMATED CLIMATE EMISSION FOR SERIES 7™

When calculating the carbon footprint for individual products, it was discovered that the Series 7™ chair\* has the lowest carbon footprint in the Fritz Hansen collection measuring in at the equivalent of:

### NEW SERIES 7™ CHAIR\*\*

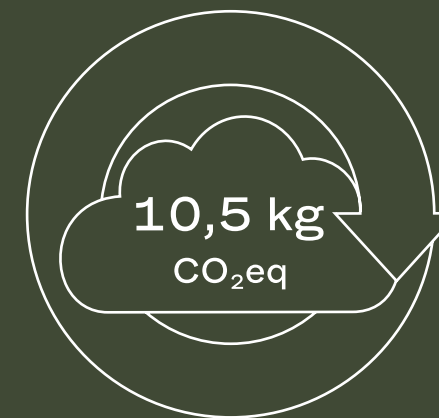

108 km drive  
in an average car

2 beef steaks  
(300g each)

When calculating the carbon footprint of a refurbished Series 7™ chair\* the carbon footprint is even lower:

### REFURBISHED SERIES 7™ CHAIR

49 km drive  
in an average car

1 beef steak  
(300g)

\*The calculation applies to model 3107 in clear lacquered veneer and chromed steel.

\*\*Potential impact of missing data: Best case 13 kg CO<sub>2</sub>eq -46% / Worst case 33 kg CO<sub>2</sub>eq +38%

# The inviting workspace

## WORKSPACE

Today's ideal office must balance a variety of purposes and working styles. It is a platform for conversation and collaboration. Employees have an expectation of a sense of community and purpose, where they feel inspired and cared for.

## Evolving spaces, meeting needs

The days of single-purpose spaces are fading as the possibilities inherent in multi-use spaces are understood more. This creates the opportunity for companies to adapt to the evolving needs of employees and new ways of thinking about how we work.

Little Giraffe™ office chair (3211), Pluralis™ table (KS431), PK23™ lounge chair, Little Friend™ table (KS14), Lissoni Sofa™ (PL117L), PK61A™ coffee table

Little Giraffe™ office chair (3211), Pluralis™ table (KS431), PK23™ lounge chair, Little Friend™ table (KS14)

# Meet and collaborate

Versatile meeting settings that adapt to various collaboration styles is a must in today's modern office. Catering to meeting requirements from formal meetings to creative workshops, learning environments and hybrid compatible spaces ensures inclusivity and productivity across all fronts.

Pluralis™ double tapered table (KS439), Little Giraffe™ office chair (3211),

## Collaboration and focus

The spaces we design allow workers to shift seamlessly between quiet concentration and intense collaboration. A design can fulfil a practical need but must also set the right atmosphere.

# Work and focus

Spaces beyond assigned desks for focus work are the new norm. For flexible work arrangements, and for those who seek a change of scenery away from the assigned desk. Informal break out areas, retreat spaces, touch down spaces and think tank areas are making their way into the modern office.

Case: Established Financial Institution  
Interior Design: Hassell  
Photographer: Nicole England

SYDNEY, AUSTRALIA

## Harmony in Biophilic Design

This established financial institution's new head office in Sydney's Quay Quarter Tower (QTT) is a beacon of innovation and biophilic design that connects the occupants to the local natural environment.

The interior incorporates abundant planting, mature trees and natural light to evoke a genuinely biophilic setting. Locally sourced and sustainable timber species showcase a rich natural history that celebrates the stories of people and culture to underwrite a unique and diverse workplace experience. Crafted by Hassell, the workplace has been conceived as a multi-level interconnected vertical village that fosters connection and joy, with features like mobility-friendly stairs and multi-purpose spaces accommodating agile work styles.

Series 7™ chair (3117)

In all aspects of the project, sustainability and lasting quality is paramount, earning the workplace a 6-star Green Star Interiors Design rating and targeting a 3-star Fitwell rating. In this case heritage lighting and upcycled furniture that originated in previous workplace generations (now in its third life cycle) are a literal expression of upcycling and sustainability in practice.

The integration of the organic curves of the Series 7™ and Swan™ chairs sit perfectly with the project ethos and spatial architecture. Both were designed by Arne Jacobsen, who, in his architectural works, drew strong influence and integrated nature in and around his buildings using plants and landscaping. Found throughout the lounge, meeting rooms, break-out areas and workstations, the sleek lines and timeless appeal of these mid-century icons complement the biophilic design and sustainable mindset underlying the project.

Series 7™ chair (3107)

# Architectural elegance

Form, function, comfort and style are elements that can turn a meeting space into an inspiring feature. Upholstered seating for extra comfort in longer meetings will help attendees keep their focus on what matters.

## Designing for meetings

Our rich selection of options allows spaces to be customised to align with the culture and ethos of our clients – whether they wish to create a sense of calm through clean lines and tactility, or to inspire people and lift their mood with colour and bold contemporary design.

Case: Beringea  
Architect: Mowat & Company  
Photographer: Christopher Horwood

LONDON, UK

## A modern switch-up office

A few years ago Beringea reshaped their workspace in London, with focus on wellbeing, considered design choices and a fresh start.

In the throes of the pandemic, Beringea saw an opportunity to switch things up and adapt their working environment in their London office. Employing the helping hand of architecture firm Mowat & Company, the company set about designing a new office space where wellbeing and collaboration take centre stage. The goal was to create a space that would allow employees to feel a sense of calm and belonging during an anxious period – whether they're working in the office, at home or in the sister office in the US.

The first thing you see as you enter the office is Beringea's circular board room, crafted in natural oak. Inspired by Quaker meeting rooms, the circular shape of the room encourages conversation and collaboration. It feels bright, light and earthy, setting the tone for the rest of the office.

Towering glass walls and wooden accents form a stark contrast to the three-and-a-half-meter high green hedge that spans the entire length of the office, bringing the outside in. Introducing elements of nature, such as greenery and natural wood, was a top priority for the architects, in an effort to enhance wellbeing.

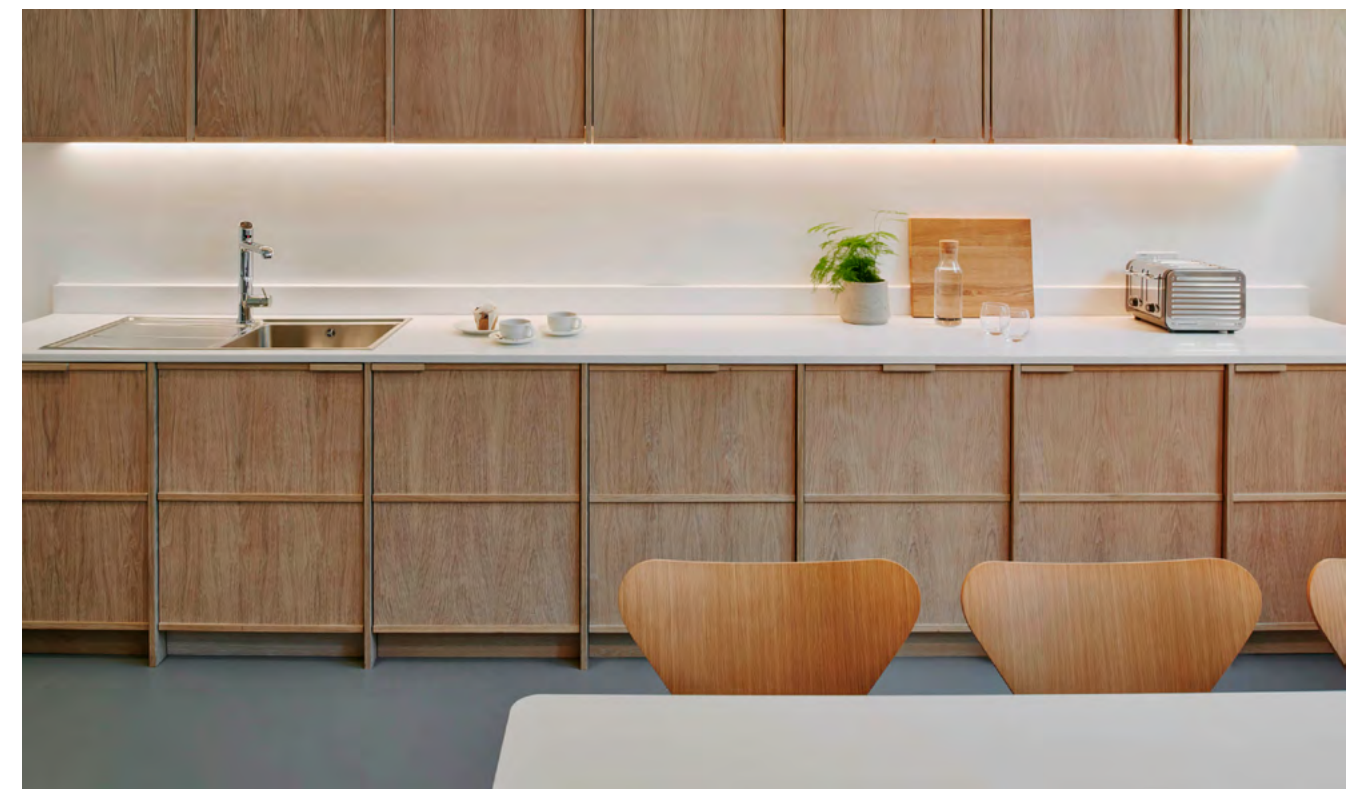

“The project is not about nervously ‘going back’ to the office. It is about confidently ‘going forward’ into a new period of time where calmness, flexibility, equality and health are the priorities.”

ALEX MOWAT,  
DIRECTOR AT MOWAT & COMPANY

At the London office, working spaces are varied and flexible. The team can opt to meet or mingle in the high-backed armchairs, at the bar, at the open-plan hot desks or in one of the many meeting pods scattered throughout the office.

Fritz Hansen pieces add a thoughtful and timeless aesthetic to the space. In one of the meeting rooms, the Pluralis™ table by Kasper Salto sits alongside a set of the iconic Series 7™ chairs by Arne Jacobsen. Both pieces are characterised by their understated design, elegance and uncompromising quality, adding a whole new level of functionality to the workspace.

The Series 7™ bar stool features in the café area – its unique shape displays character without overpowering the eye. The kitchen itself has been handcrafted in natural oak wood and serves as a meeting point for the team throughout the day. The appeal of these mid-century icons complement the biophilic design and sustainable mindset underlying the project.

## Come together

Co-working spaces, both big and intimate, are zones where the full potential for creative collaboration can be achieved. However, ensuring these spaces serve more than functional requirements means looking into the impact of design, comfort, and quality over time.

## Thoughtful design

An ideal workspace is one that is thoughtfully designed to prioritise the needs and preferences of the employee, fostering a positive and productive work environment where individuals and teams can thrive.

Whether in open office environments, private or executive offices, supporting productivity, collaboration, creativity and most importantly, employee wellbeing must be at the centre.

# A welcoming guest experience

## HOSPITALITY

Good design is fundamental to creating immersive and memorable experiences for meeting, greeting, hosting, socialising and dining. For over 150 years, Fritz Hansen has designed and manufactured furniture that elevates the spaces in which we interact, work and socialise, from lobbies and lounges to bars and restaurants, hotel rooms, co-working and conferences spaces.

## Be my guest

A design can both fulfil a practical need but must also set the right atmosphere. The Monolit™ chair's cocooning shape and organic curves offers guests a sense of privacy and comfort. Crafted in two heights, ideal for dining and lounge, its innovative design adapts effortlessly to the needs of any hospitality environment.

## Recharge and socialise

Pleasant, relaxed seating and comfortable lighting invite guests to engage positively with their surroundings. Engaging social spaces makes guests want to stay for a while and creates a lasting impression.

## A vision coming to life

The lobby is a space that expresses the company's brand identity and sets the tone of the company culture. It can be used to welcome visitors, facilitate connections, and create a sense of belonging for employees.

Case: Bornyon  
Interior Design: A-D-O  
Photographer: "texture on texture"

SEOUL, SOUTH KOREA

## A sanctuary of naturalness and comfort

As Seoul's Bornyon restaurant prepares to welcome guests, Youngkwon Kim and Geonyoung Kan reflect on the journey that brought their vision to life.

When Youngkwon Kim of the real estate development company PLAYA and Geonyoung Kang, architect and CEO at A-D-O Design Architecture Office, joined forces to design the interior of Bornyon, a restaurant in the heart of Seoul, they envisioned a dining destination beyond mere sustenance. Looking to a mutual belief in the transformative power of space, food and community, they wanted to create an experience steeped in authenticity and comfort.

The essence of Bornyon lies in its commitment to understanding the needs of its customers deeply. In a landscape where many restaurants struggle to sustain themselves, Youngkwon Kim and Geonyoung Kang recognised the importance of crafting a space that resonates with patrons on a fundamental level. Through meticulous surveys and careful consideration, the vision for the restaurant emerged: a sanctuary of naturalness and comfort where guests could find solace and delight in the simple pleasures of life.

Rooted in a deep respect for craftsmanship and an unwavering commitment to excellence, Bornyon embodies the spirit of collaboration and innovation, setting a new standard for dining experiences in Seoul and beyond.

“We aimed to create a space rich in contrasts, paradoxes and ambiguities in design elements, providing a quiet yet abundant sensibility to the space. So that every time guests visit, they encounter a slightly different space,”

GEONYOUNG KANG

“The crucial element in this space is time. The feeling of time passing, the sensation of time standing still, the ambience of sunset and, occasionally, an environment where the background fades away, allowing focus on cuisine and conversation,” he adds. It’s no coincidence that the very name of the restaurant means the essential state or nature of something.

At the heart of Bornyon’s design philosophy is furniture that embodies comfort and heritage. In step with customers seeking naturalness and comfort in both space and service, the restaurant is filled with “pieces that have emerged from craftsmen’s long deliberation, endlessly refined, and born through their dedication,” explains Youngkwon Kim.

Each piece carries its own sense of time and history, most notably the Series 7 and Swan chairs – the latter selected in a dining height. With these, the duo sought to create a space that not only exudes sophistication but also prioritises the physical and emotional well-being of its patrons.

“The chairs were chosen before the spatial design was finalised. Compared to many other decisions, Fritz Hansen chairs were selected swiftly and firmly. In fact, the design changed completely from the

next day onwards. It’s a project where the furniture selection wasn’t tailored to fit the space, but rather where the space design was influenced by the furniture considerations,” notes Geonyoung Kang.

The decision to choose the chairs upholstered with natural leather was driven by a desire to imbue the space with a sense of enduring beauty. Despite initial concerns about the practicality of leather in a restaurant setting, both Youngkwon Kim and Geonyoung Kang were captivated by its ability to age gracefully, bearing the marks of time as a testament to its enduring charm.

“From the perspective of an architect, the sense of the passage of time and its naturalness was the key reason for this choice. It was important to evoke the essence of serene relaxation, making it essential for the chairs to be more comfortable, cosy and age naturally over time compared to others,” explains Geonyoung Kang. “I have come to believe that true durability is about furniture that becomes more beautiful over time. For these reasons, I found natural leather highly appealing because even if it gets stained with wine or marks from hands, it ages beautifully. I imagine it would be very welcoming to see those marks when revisiting the restaurant in ten years’ time,” Youngkwon Kim adds.

## Welcoming comfort

Soft seating in lobbies is key to creating a space where visitors feel at ease. It should provide comfort for both social interactions and moments of solitude, inviting people to stay a while. Thoughtful design of these spaces ensures a welcoming atmosphere, where comfort meets style, allowing everyone to feel relaxed.

Monolit™ lounge chair (CM231), Analog™ coffee table (JH63A)

## Embrace comfort and elegance

Designed for relaxation, the Monolit™ Lounge chair invites guests to unwind in a cocooning embrace. Its sculptural curves and soft silhouette create a sense of privacy and comfort, making it the perfect addition to any hospitality setting. With a design that seamlessly balances aesthetics and function, Monolit™ Lounge enhances the atmosphere while adapting effortlessly to its surroundings.

Monolit™ lounge chair (CM231), Analog™ coffee table (JH63A)

## Compact comfort

Making a lasting impression means surpassing practical needs and creating an impact through beauty, long-lasting quality, craftsmanship and, above all, comfort. Appealing from every angle, the compact and sculptural design of the Fri™ Sofa works beautifully as a room divider, adding an artistic touch to any space.

COPENHAGEN, DENMARK

## Arne Jacobsen's Gesamtkunstwerk Masterpiece

Arne Jacobsen was one of the greatest Danish architects of the twentieth century. His versatile talent won him both national and international acclaim. Arne Jacobsen mastered all elements in the architectural process, from the great lines to minute details. One of his professed methods was high-quality craftsmanship.

The construction of the SAS Royal Hotel in Copenhagen began in 1956. Four years later, the hitherto tallest building in the Nordics, and the largest hotel in Scandinavia, was ready for inauguration. Standing twenty-two floors tall, the hotel was dubbed a "Landmark of the Jet Age", characterising the 1950s. Considered the most modern hotel in Scandinavia, Arne Jacobsen's attention to detail in terms of functions and the choice of materials in the overall design, as well as in individual objects, is still admired today.

Egg™ lounge chair (3316), Swan™ lounge chair (3320),

Exterior of Radisson Collection Royal Hotel

Egg™ lounge chair (3316), Swan™ lounge chair (3320),  
Series 3300™ sofa & lounge chair (3302, 3300)

Today, the SAS Royal Hotel (since renamed Radisson Collection Royal Copenhagen) remains a prominent example of Danish modernist architecture. Famed worldwide as the hotel where the architect designed every detail, it is the most harmonious high-rise building in Copenhagen and constitutes an ideal in Modern Design.

Arne Jacobsen's artistic talent is evident throughout the hotel - from the proportions of the building to the design of the interior. His remarkable ability to carry through an all-encompassing design - a *gesamtkunstwerk* - is one to be admired.

#### ENDURING ICONS

Of the many details Arne Jacobsen designed for the hotel, several of the chairs he created have established themselves as design icons. The Egg™, Swan™ and Drop™ chairs are perhaps the most familiar. However, a fourth, the Pot™ chair, is no less significant. The small lounge chair brings a beautiful floating expression. Designed for the hotel's social areas, the Pot chair's sculptural curves and slim legs reflect the simplicity and openness of the building's design.

Drop™ chair (3110)

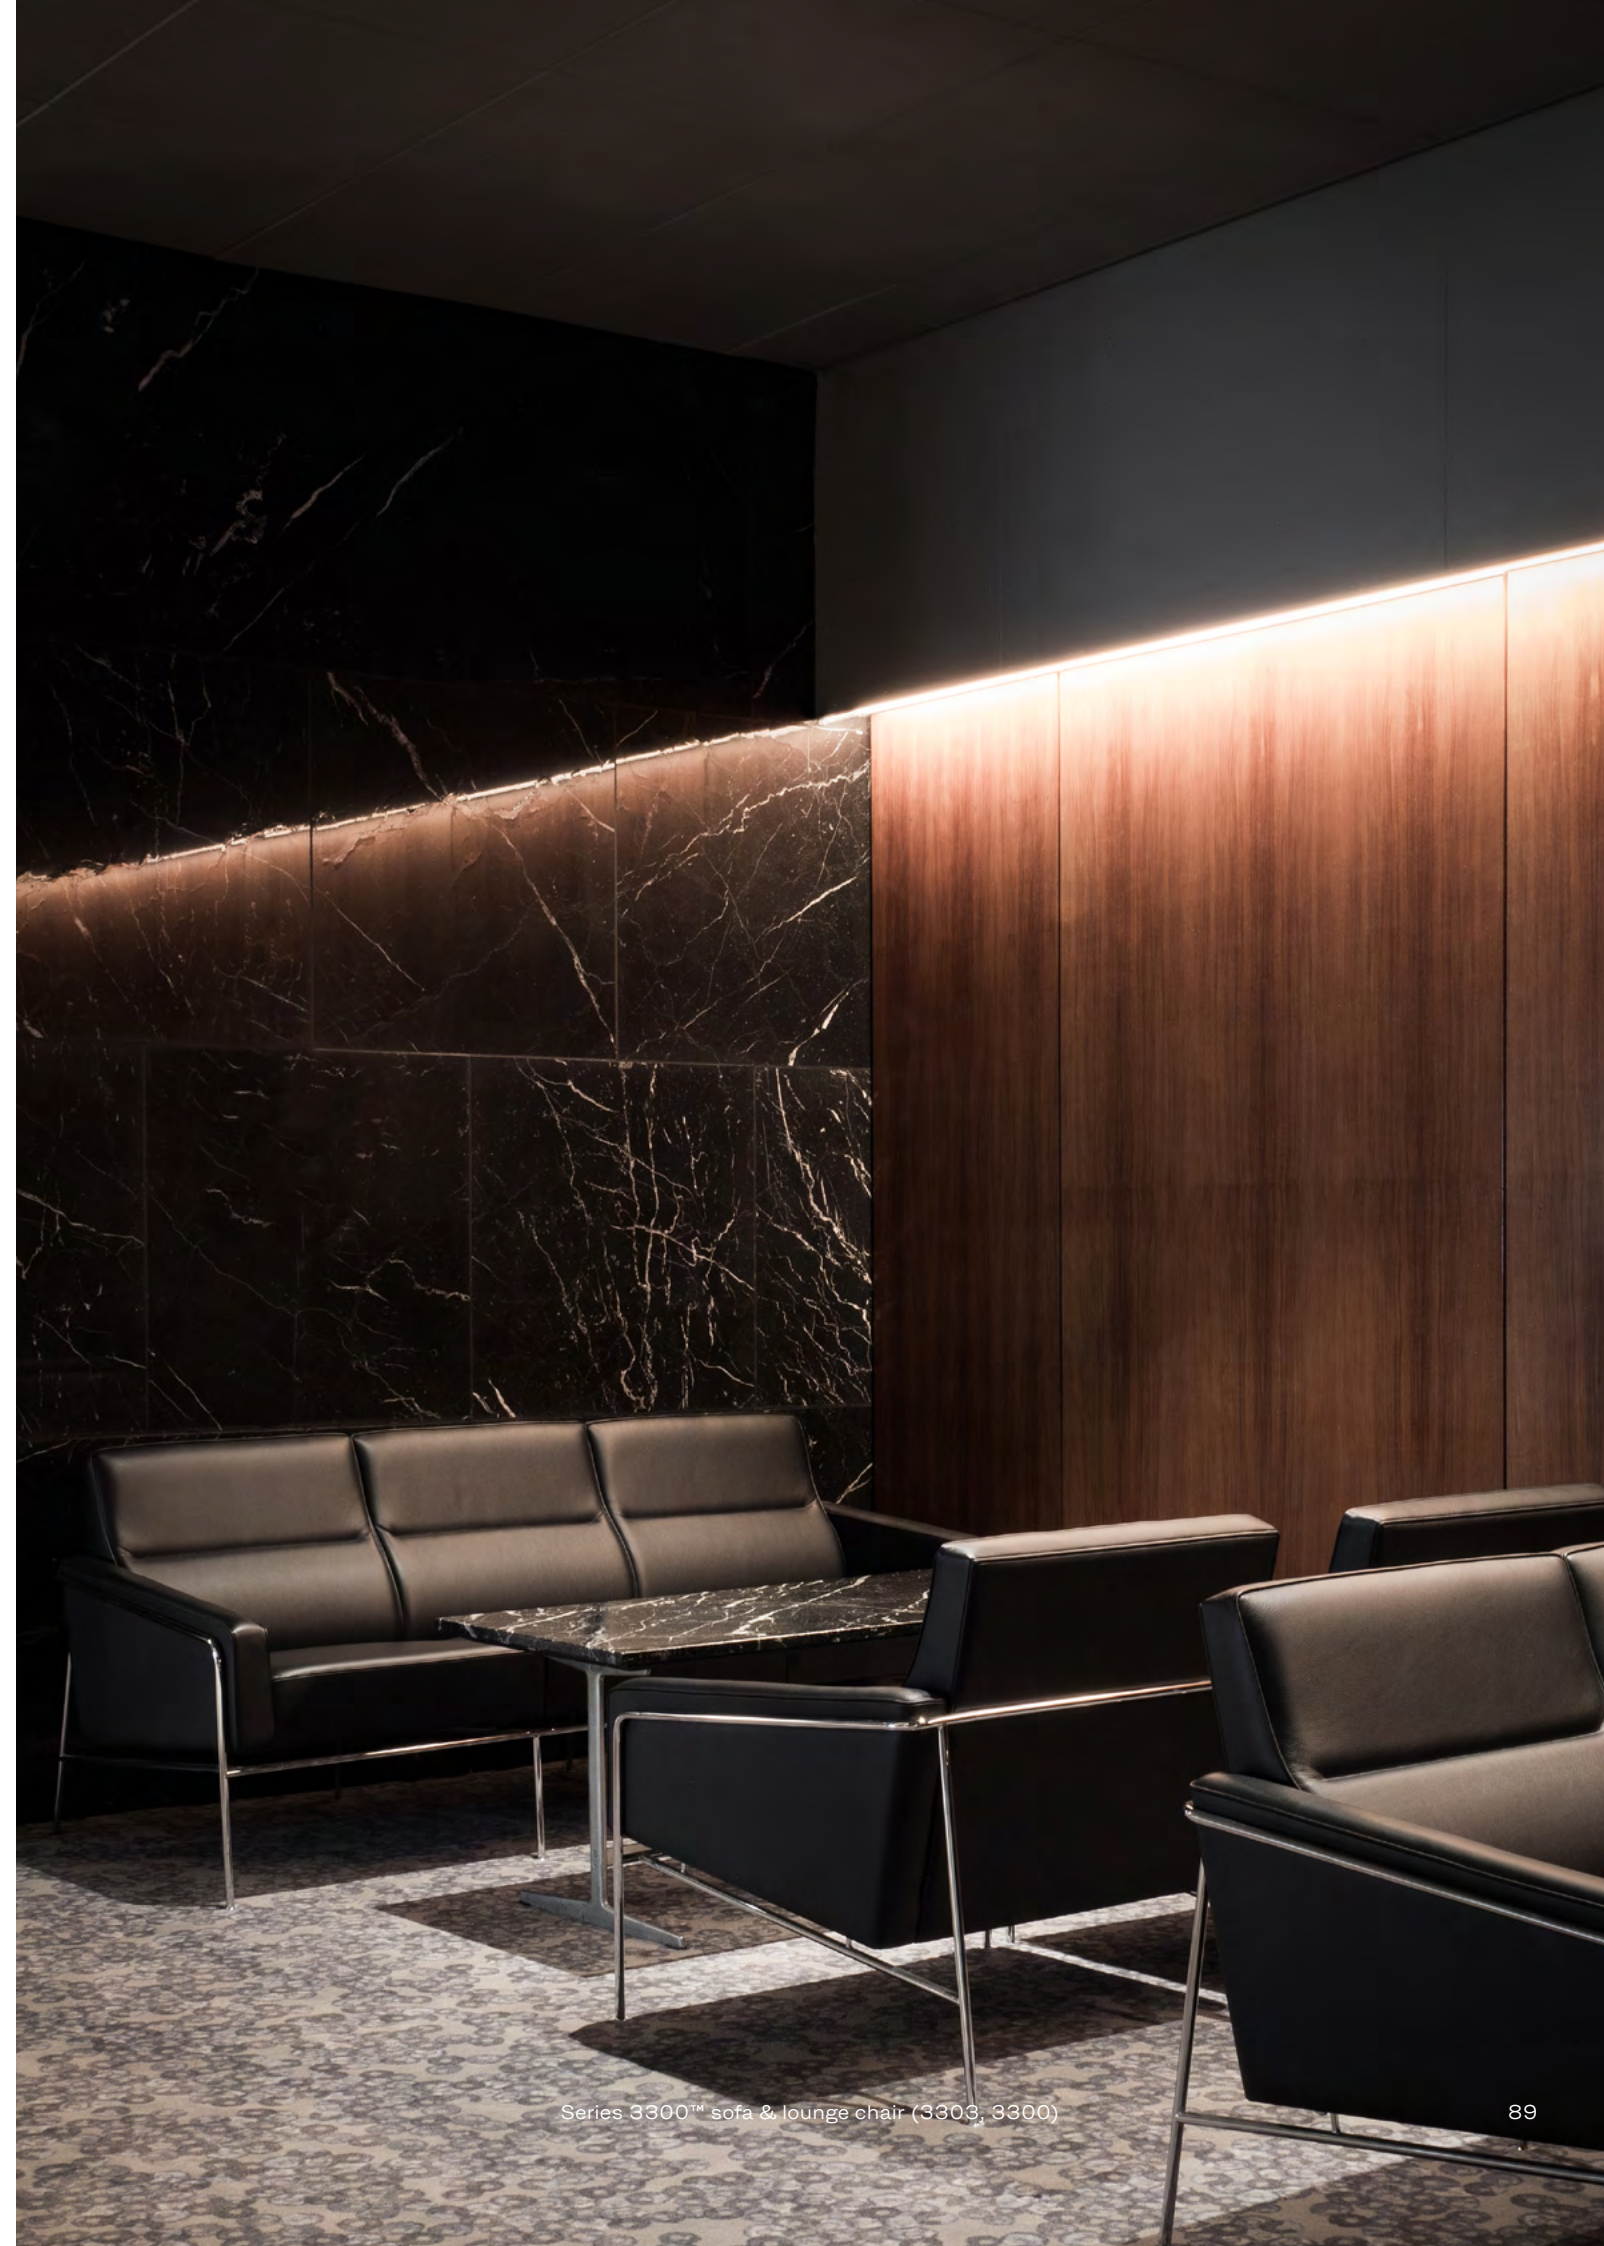

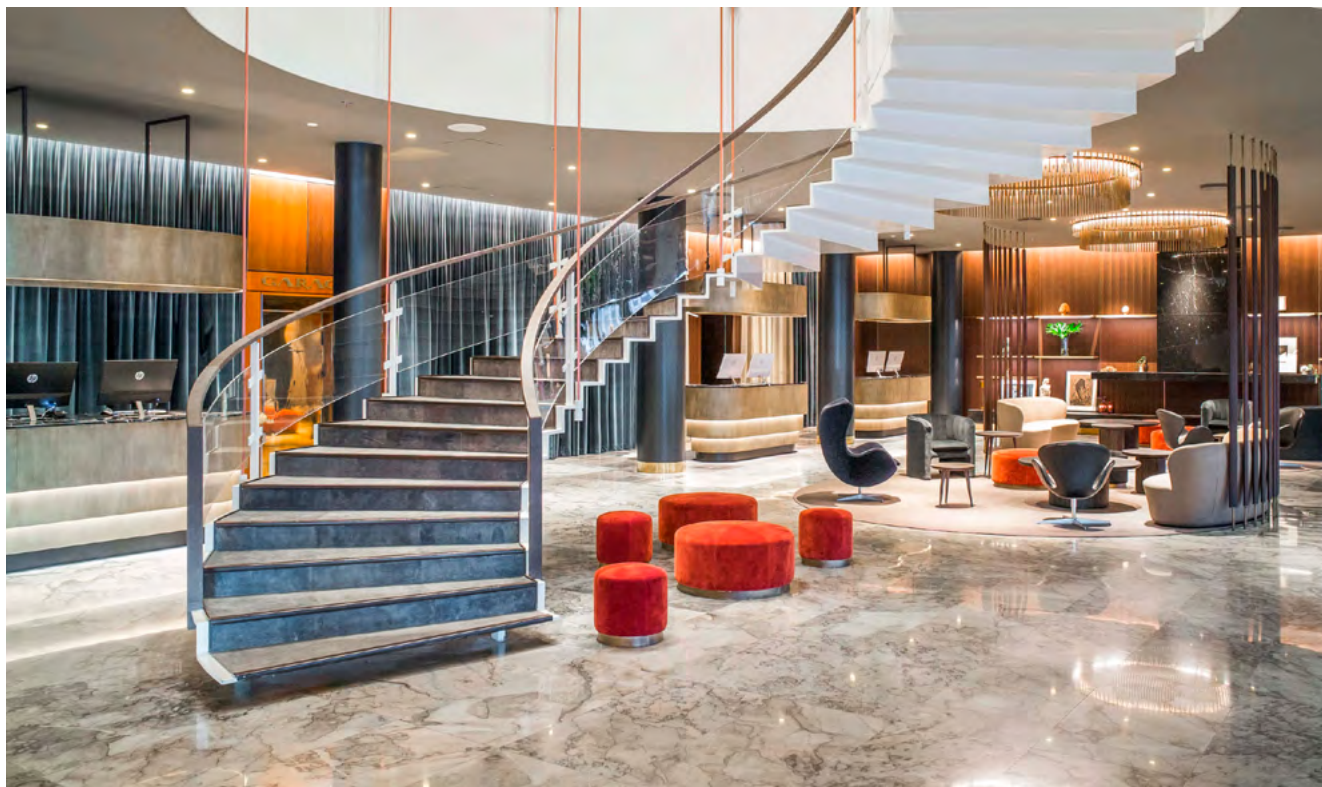

**THE LOBBY**

The present hotel lobby is in many ways similar to the 1960s lobby. Floor-to-ceiling glass panes separate the lobby from the hustle and bustle of the street while letting daylight into the room. The result is a calm, exclusive atmosphere. The iconic Egg™ and Swan™ chairs, which were specially designed for the hotel, match the pleasant calm of the room.

**STAIRCASE**

Together with the organic forms of the Swan™, the curved staircase constitutes a strong contrast to the sharp cut, simple structure of the hotel. The very slight structure of the staircase was on the verge of what was technically feasible at the time. steeped in authenticity and comfort.

Fri™ lounge chair (JH4)

## Room for imagination

A good chair is one of life's little luxuries, essential for long visits, enjoying a drink or getting work done. Fritz Hansen seating is tested for quality and comfort, designed with precision to fit beautifully into everyday life and spaces.

Reference: Art'otel Battersea (UK)  
Fri™ lounge chair (JH4)

## Designing elegant accommodations

A hotel room is both a destination and an experience for leisure and business travellers. It can serve as a workspace, a relaxation spot, and an oasis from the outside world.

# Design for wellbeing

## **PUBLIC SPACES**

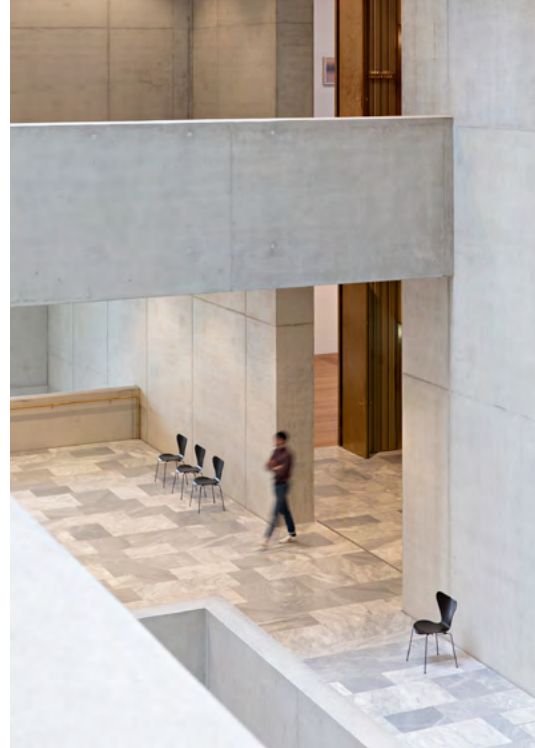

Public spaces are vital social environments that shape the experiences and interactions of those present. When designed well, they can inspire, foster connections, and create a sense of belonging while providing opportunities for collaboration, social engagement, and heightened wellbeing.

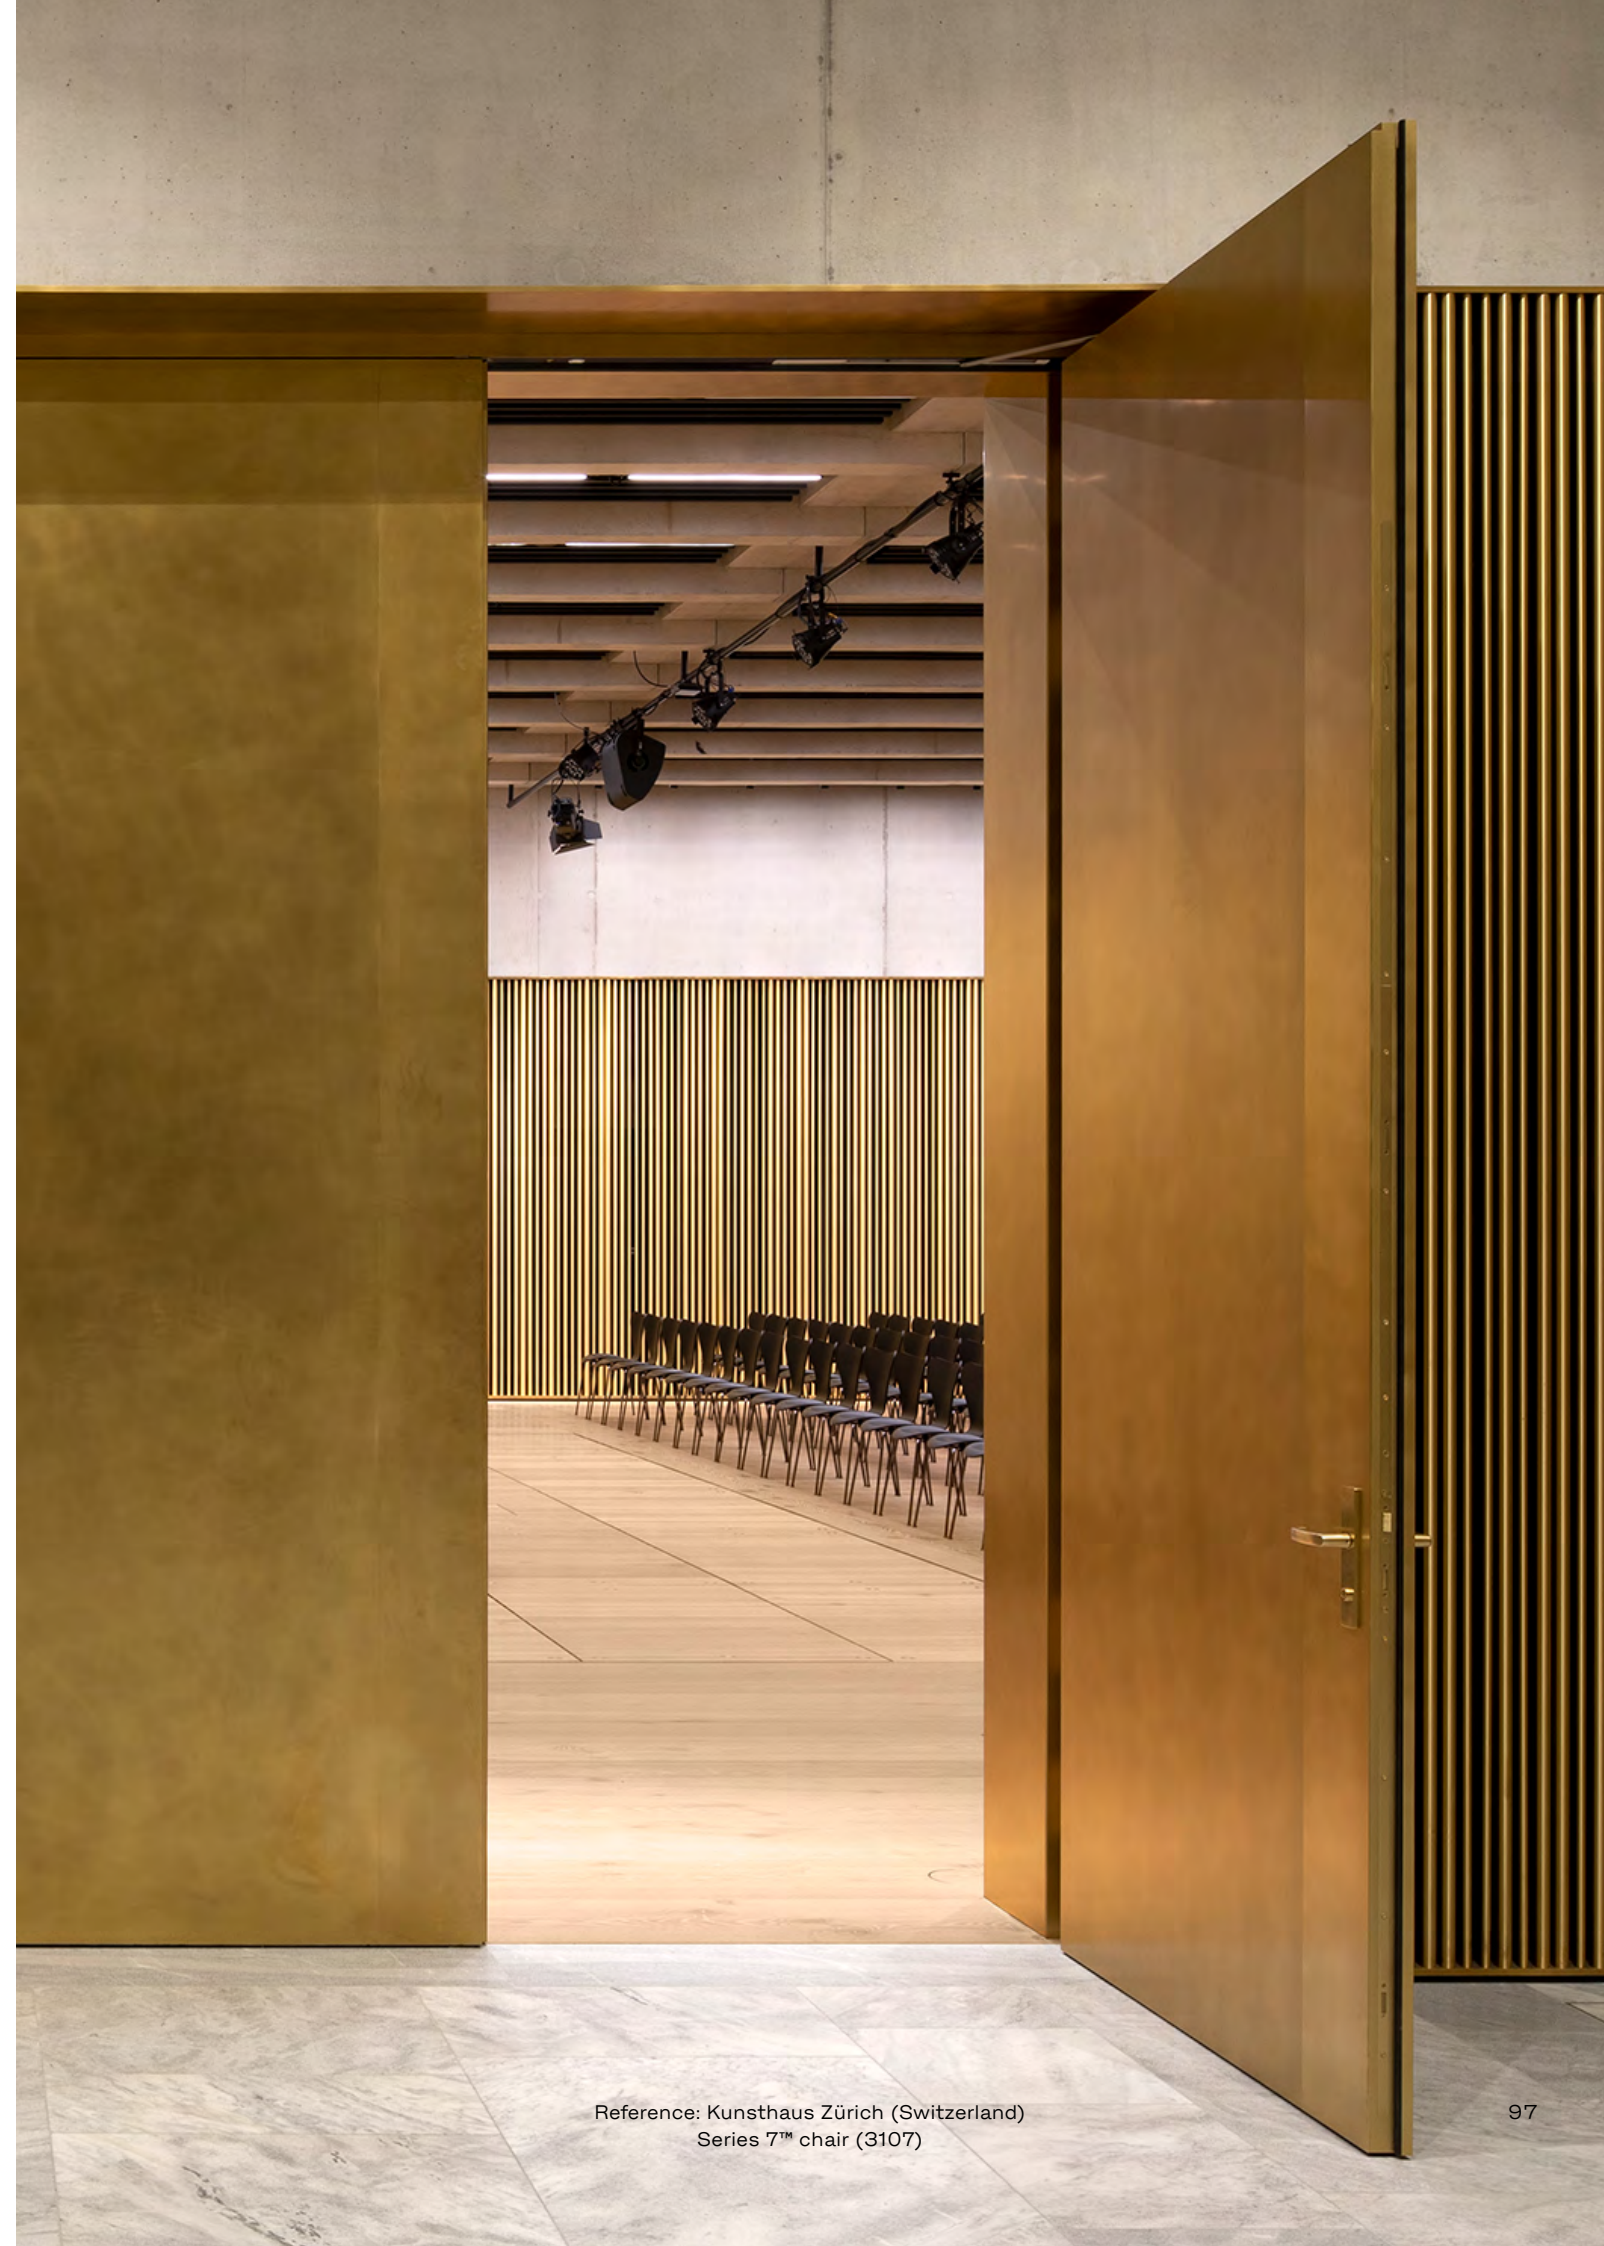

## Inspiring spaces

Good design can enhance the experience of a public space, while ensuring it operates with seamless efficiency.

Reference: Kunsthaus Zürich (Switzerland)  
Series 7™ chair (3107)

Reference: Kunsthaus Zürich (Switzerland)  
Series 7™ chair (3107)

## Learning and focus

Purposefully designed learning spaces, like classrooms, lecture halls, and libraries, thrive when they foster concentration and creativity. The N02™ Recycle is a multi-use chair made from upcycled plastic household waste that can be recycled again.

## Time to listen

The right seating solution enhances both focus and atmosphere in any conference setting. With the iconic Series 7™ chair, refined design and practical functionality come together – ideal for spaces where both aesthetics and efficiency matter. The chair's curved form offers natural support, promoting comfort and concentration throughout the day.

Case: St Catherine's College  
 Architect & interior design: Arne Jacobsen  
 Photographer: Egon Gade

OXFORD, UK

## Unifying Environment

The idea behind St Catherine's College was to balance innovative and traditional elements on Oxford University's campus. In 1957, the university's newest and largest college was to create a unifying building that would set a new standard for college buildings in Oxford and the rest of the world.

The architect Arne Jacobsen was given this task. Today, the result remains as an understated landmark in the history of architecture. "It's all done with restraint, the minimum number of elements and materials, with everything beautifully executed. It's extraordinarily refined. Jacobsen showed you don't need to show off to get recognition," says Rab Bennetts from Bennetts Architects, one of the UK's largest architectural firms.

The buildings follow a strict module of squares and repetitions that follow the tradition of British universities. There is the danger that this might be boring, but it is not the case at all. One of the buildings is clad all the way down, another is open with a brise-soleil, and a third is closed with brick. It draws much inspiration from Mies van der Rohe but with a Scandinavian sensibility.

Exterior of St Catherine's College

Series 7™ chair (custom model w. writing table)

Oxford™ chair (archive piece), Series 7™ chair (3107)

The Banquet Hall at St Catherine's College evokes the iconic Oxford halls where three long student tables lead to a diagonal table for the professors and staff. The content and proportions are the same as in the older Oxford colleges, but the furniture is light, bright and modern.

Students sit on light Series 7™ chairs, while the staff sit on specially developed Oxford™ chairs. The Oxford™ chairs feature the same high back as at the other colleges, but are ergonomically shaped and can be rotated to facilitate the conversation around the table, while the high back offers privacy. The result is a banquet hall, where students and staff talk, eat and study in a completely modernist universe.

In the library, Arne Jacobsen has introduced a more open kind of library atmosphere that can act as an informal meeting place for students. Swan™ chairs are arranged at specific distances around a table, so you can share the table with strangers undisturbed and still be able to talk with the fellow students and colleagues who pass by. Today, Jacobsen's focus on bringing people together might seem obvious. But in 1957, when women were not yet allowed to study at St Catherine's College, it was quite an eye opener.

The buildings and interior have not changed much since it opened in 1963, and the whole area has received a Grade I listing, the UK's highest protection level. "A lot of contemporary architecture is at its best on completion and then progressively loses its sheen over time, while buildings like this mature," says Rab Bennetts. And thus, Jacobsen managed to set the new modern standard for university buildings. biophilic design and sustainable mindset underlying the project.

Swan™ lounge chair (3320), Circular coffee table (custom)

## Relax and stay awhile

A chair's design holds the power to provide comfort, foster connections, and reflect the inherent beauty in functional simplicity. The Ro™ lounge chair is aptly named after the Danish word for 'tranquillity'. The easy chair creates space for relaxation and reflection, enticing you to immerse in its curves and take a moment for yourself.

## A nice place to wait

A well-designed waiting area should foster calm and relaxation. By creating a serene environment, it instills trust and helps visitors feel at ease. Thoughtful seating and design elements make the wait more pleasant, ensuring a positive experience from the moment you arrive.

## Design that invites and inspires

In hospitality spaces, every detail matters - from the soft glow of natural light to the choice of colors and the flow of the room. These colours come together to create a welcoming atmosphere where guests can unwind and recharge. Thoughtfully designed interiors not only enhance comfort but also inspire and elevate the guest experience, making every moment memorable. Aesthetic choices, spatial harmony, and attention to detail all work to shape a setting that invites both relaxation and inspiration.

## Sustainable design of public spaces

In today's world, libraries are not merely book repositories but dynamic hubs for lifelong learning and community engagement.

The New Canaan Library in Connecticut embraced this vision, embarking on an ambitious project to create a space that would serve its diverse community for the next century with a sustainability focus.

The primary challenge was to design a space catering to a wide range of needs and visitors while considering sustainability factors and comfort. The library's mission was clear: foster social connection and provide accessible learning, creativity, and relaxation resources. To achieve this, the library's space underwent a remarkable transformation.

Every decision in the project considered the human impact on the environment. The architects integrated energy-efficient systems, renewable energy, eco-friendly materials, and durable furniture that would last through years of frequent use.

Upon entering the new library building, visitors are immediately struck by a sense of possibility. The interior is bathed in natural light, with abundant natural materials and finishes, creating a classically modern and neutral palette. It's an environment that raises the bar for what a library can be, instantly conveying a sense of belonging and inspiration.

#### SPACES FOR EVERYONE

The Concourse on the main floor is a vibrant hub with amenities like books, art exhibitions, and a cosy café. The soft curves of the Swan™ chairs and Ro™ lounge chairs invite people to sit and relax. Throughout the different rooms over several floors, additional Danish design from Fritz Hansen adds its enduringly modern touch in a quality that will stand the test of time and use.

Inside the Auditorium in a spectacular arrangement, a special project where more than 300 donated and individually engraved Series 7™ chairs serve as a visual reminder of the library's role as a unifying platform for lifelong learning in the community. Each chair is a testament to the library's civic-minded and involved community, reflecting its dedication to fostering a sense of togetherness. With daily traffic doubling after the library's reopening, durability and resilience became paramount considerations when selecting the chair type for donors to engrave.

These chairs needed to withstand constant use while maintaining their comfort and appearance. The endurance testing of the Series 7™ chairs by Fritz Hansen reinforced their suitability for the library's needs.

**“When deciding on the Series 7 chairs durability was a key concern. With 1100-1300 visitors per day on average, durability is a huge issue. Our furnishings need to look good and feel comfortable all the time, no matter how they're being used.”**

**LISA OLDHAM,  
EXECUTIVE DIRECTOR**

The new New Canaan Library has become the beating heart of its community, welcoming in more and more people, an increase in room bookings and attracting private donations. It stands as a testament to what can be achieved when a vision of inclusivity, sustainability, and learning comes to life in the form of a healthy and comfortable environment that belongs to everyone.

# Join us outside

## **OUTDOOR**

Outdoor spaces in hospitality and work environments offer a refreshing escape, blending functionality with nature. Designed to enhance well-being, these areas encourage collaboration, relaxation, and creativity, making them ideal for work or leisure in the open air.

## Harmony in wood

Fritz Hansen's outdoor collection seamlessly integrates with modernist retreat landscapes, offering enchanting spaces for contemplation and relaxation.

SEA RANCH, US

## Harmonising nature and design

Set on the dramatic beauty of Sonoma Coast in Northern California, Sea Ranch Lodge has embodied a seamless fusion of architecture and nature since its inception in the 1960s. A recent project with Fritz Hansen has elevated its outdoor space with inviting and functional nature-inspired aesthetics.

Conceived as an experiment to harmonise architecture with nature, Sea Ranch Lodge quickly became a shining symbol of California's architectural heritage. Over time, it has grown into a living testament to sustainable design, where architecture blends seamlessly into the surrounding beauty of the rugged natural landscape.

The history of Sea Ranch Lodge is one of visionary architecture and sustainability. Emerging as an architectural experiment in the 1960s, it has since become a symbol of sustainable design along the California coastline. The Fritz Hansen project pays tribute to this heritage by integrating with the natural setting and reflecting its commitment to enduring design principles.

A recent outdoor transformation uses Fritz Hansen's outdoor pieces. Chosen for their minimalist Nordic design and inspired by nature, the exquisitely crafted wooden benches and stools create an inviting outdoor haven for guests and residents.

Among the pieces, the Cutter bench and stool, the Banco bench and Between Lines deck chair harmoniously complement the Lodge's wooden surroundings, elevating the atmosphere with modern elegance and inviting comfort.

#### A SPACE FOR EVERYONE

Beyond its role as a retreat, Sea Ranch Lodge actively fosters local connections. It has a close-knit community drawn together by a shared love for the coast and a dedication to preserving the Lodge's legacy. It also serves as a local post office, with dedicated mailboxes for each of the community's residents. Here, neighbours meet, greet, and engage in conversations. This aspect is integral to the Lodge's history, as it not only caters to residents' practical needs but also fosters a sense of connection and a communal space.

The recent collaboration with Fritz Hansen at Sea Ranch Lodge embodies its commitment to enduring design and respect for the beauty of its natural surroundings. This project celebrates Sea Ranch Lodge's essence, where architecture and nature seamlessly merge, and remains a place where California's architectural heritage thrives and the Sonoma Coast's beauty continues to inspire.

## Outdoors at work

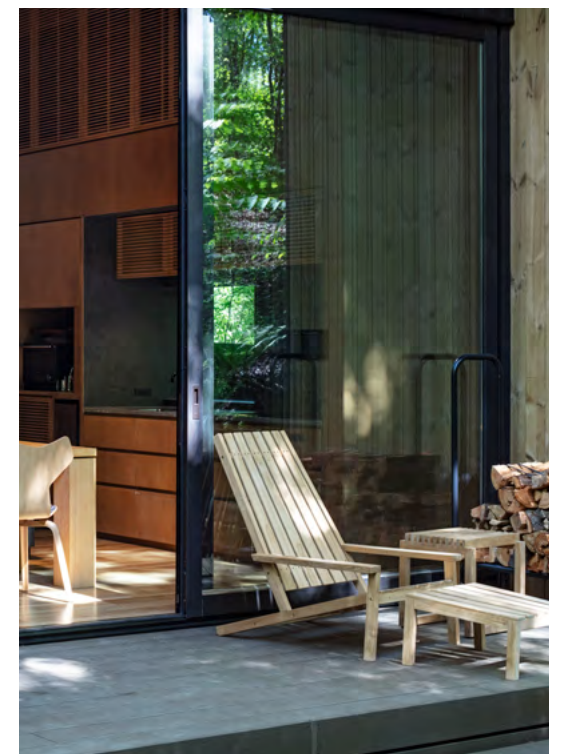

Outdoor spaces in the workplace offer employees a much-needed break, providing a serene environment that fosters creativity and collaboration. These areas help reduce stress, improve focus, and create a positive atmosphere that supports both individual well-being and team dynamics.

## Nature's hospitality

Outdoor spaces in hospitality settings provide a sanctuary for relaxation and connection. Surrounded by nature and fresh air, these areas create an inviting atmosphere that encourages guests to unwind, share moments, and enjoy the outdoors.

ANT™

Arne Jacobsen, 1952

**MODEL: 3100**  
Height: 77 cm / 30.3 in  
Seat height: 44 cm / 17.3 in  
Width: 52 cm / 20.4 in  
Depth: 51 cm / 20 in  
Features: Stackable

**MODEL: 3101**  
Height: 81 cm / 31.9 in  
Seat height: 46 cm / 18.1 in  
Width: 52 cm / 20.4 in  
Depth: 48 cm / 18.9 in  
Features: Stackable

**MODEL: CHILDREN'S CHAIR**  
Height: 60 cm / 23.6 in  
Seat height: 34 cm / 13.3 in  
Width: 40 cm / 15.7 in  
Depth: 42 cm / 16.5 in  
Features: Stackable

CARIMATE™

Vico Magistretti, 1959

**MODEL: VM120**  
Height: 76,5 cm / 30.1 in  
Seat height: 45 cm / 17.7 in  
Armrest height: 62,5 cm / 24.6 in  
Width: 58 cm / 22.8 in  
Depth: 52,3 cm / 20.6 in

CHINA CHAIR™

Hans J. Wegner, 1944

**MODEL: 4283**  
Height: 82 cm / 32.3 in  
Seat height: 45 cm / 17.7 in  
Armrest height: 68 cm / 26.8 in  
Width: 55 cm / 21.7 in  
Depth: 55 cm / 21.7 in

DIRECTOR'S CHAIR

Skagerak Design

**MODEL: CHAIR**  
Height: 87,5 cm / 34.4 in  
Seat height: 46 cm / 18.1 in  
Width: 57 cm / 22.4 in  
Depth: 43 cm / 16.9 in  
Features: Foldable

DROP™

Arne Jacobsen, 1958

**MODEL: 3110**  
Height: 88,5 cm / 34.8 in  
Seat height: 46 cm / 18.1 in  
Width: 45,5 cm / 17.9 in  
Depth: 54,5 cm / 21.5 in

**MODEL: 3110**  
Height: 88,5 cm / 34.8 in  
Seat height: 46 cm / 18.1 in  
Width: 45,5 cm / 17.9 in  
Depth: 54,5 cm / 21.5 in

GRAND PRIX™

Arne Jacobsen, 1957

**MODEL: 3130**  
Height: 83 cm / 32.7 in  
Seat height: 46 cm / 18.1 in  
Width: 48 cm / 18.9 in  
Depth: 51 cm / 20.1 in  
Features: Stackable

**MODEL: 3131**  
Height: 82,2-94,2 cm / 32.4-37.1 in  
Seat height: 44-56 cm / 17.3-22 in  
Width: 52 cm / 20.5 in  
Depth: 48,7 cm / 19.2 in

**MODEL: 3138**  
Height: 107 cm / 42.1 in  
Seat height: 64 cm / 25.2 in  
Width: 51 cm / 20 in  
Depth: 54,4 cm / 21.4 in

**MODEL: 3139**  
Height: 112,8 cm / 44.4 in  
Seat height: 76 cm / 29.9 in  
Width: 53,6 cm / 21.1 in  
Depth: 58,7 cm / 23.1 in

**MODEL: 4130**  
Height: 83 cm / 32.7 in  
Seat height: 46 cm / 18.1 in  
Width: 50 cm / 19.7 in  
Depth: 51 cm / 20.1 in

**MODEL: CHILDREN'S CHAIR**  
Height: 61 cm / 24 in  
Seat height: 34 cm / 13.3 in  
Width: 40 cm / 15.7 in  
Depth: 42 cm / 16.5 in  
Features: Stackable

HVEN

Anton Björnsing

**MODEL: ARMCHAIR**  
Height: 86,5 cm / 34.1 in  
Seat height: 44,5 cm / 17.5 in  
Width: 53 cm / 20.9 in  
Depth: 52,5 cm / 20.7 in  
Features: Seat cushion

**MODEL: BAR STOOL**  
Height: 86 cm / 33.9 in  
Seat height: 67 cm / 26.4 in  
Width: 47 cm / 18.5 in  
Depth: 44,5 cm / 17.5 in  
Features: Seat cushion

LILY™

Arne Jacobsen, 1970

**MODEL: 3108**  
Height: 83 cm / 32.6 in  
Seat height: 46 cm / 18.1 in  
Width: 54 cm / 21.2 in  
Depth: 49 cm / 19.2 in  
Features: Stackable

**MODEL: 3208**  
Height: 83 cm / 32.6 in  
Seat height: 46 cm / 18.1 in  
Armrest height: 71 cm / 28 in  
Width: 62 cm / 24.4 in  
Depth: 49 cm / 19.2 in

**MODEL: CHILDREN'S CHAIR**  
Height: 61 cm / 24 in  
Seat height: 34 cm / 13.3 in  
Width: 40 cm / 15.7 in  
Depth: 42 cm / 16.5 in  
Features: Stackable

LITTLE GIRAFFE™

Arne Jacobsen, 1959

**MODEL: 3201**  
Height: 89,5 cm / 35.2 in  
Seat height: 46 cm / 18.1 in  
Armrest height: 65,5 cm / 25.7 in  
Width: 64 cm / 25.2 in  
Depth: 61 cm / 24 in  
Features: Replaceable cover (3201R)

**MODEL: 3211**  
Height: 80-89,5 cm / 31.5-35.2 in  
Seat height: 42-51,5 cm / 16.5-20.3 in  
Armrest height: 60,5-70 cm / 23.8-27.6 in  
Width: 64 cm / 25.2 in  
Depth: 61 cm / 24 in  
Features: Replaceable cover (3211R)

MONOLIT™

Cecilie Manz, 2024

**MODEL: CM220**  
Height: 76 cm / 29.9 in  
Seat height: 44 cm / 17.3 in  
Armrest height: 72 cm / 28.3 in  
Width: 60,5 cm / 23.8 in  
Depth: 54,5 cm / 21.4 in

**MODEL: CM221**  
Height: 76 cm / 29.9 in  
Seat height: 44 cm / 17.3 in  
Armrest height: 72 cm / 28.3 in  
Width: 60,5 cm / 23.8 in

# Benches & Stools

A bench and a stool share a quiet elegance that speaks to the value of simplicity, the utility of functionality, and the beauty found in the spaces between.

Height: 22,5 cm / 8.8 in  
Diameter: 24 cm / 9.4 in  
Colour: White, Light grey, Black,  
Copper

**MODEL: PENDANT P2**  
Height: 36 cm / 14.2 in  
Diameter: 38,5 cm / 15.1 in  
Colour: White, Light grey, Black,  
Copper

Over longer periods, a space must adapt as a business grows and evolves. Tastes, meanwhile, are not universal: the aesthetic of an environment needs to fit with the culture of an organisation as well as the local context. While some design principles are universal, the ability to make choices when it comes to forms, colours and materials matters.

# Customised solutions

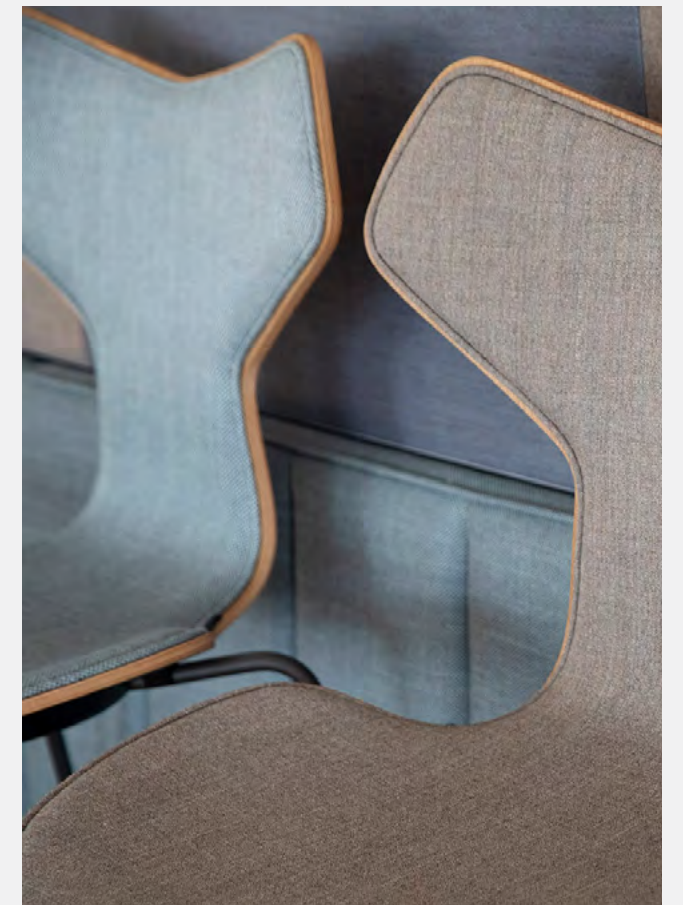

Just as architects design buildings to meet the unique needs of their users, Fritz Hansen creates bespoke interior solutions tailored to fit every individual project. We collaborate with clients across the globe to develop customised designs that seamlessly adapt to their specific spaces, functions, and aesthetics.

## UPHOLSTERY

We offer the option for customers to supply their own textiles (COM) or leathers (COL), allowing for full creative freedom and the opportunity to personalise each piece to match specific design visions or brand aesthetics. All materials provided must meet our quality and suitability requirements to ensure the highest standards of craftsmanship and durability.

## BESPOKE DESIGN

We offer a wide range of bespoke design adaptations, allowing you to tailor pieces to fit your specific needs and aesthetic.

For an added personal touch, we offer the option to engrave names, logos, or other custom details directly into the chair, creating a truly unique and personalised design statement.

These options ensure each piece is thoughtfully tailored to fit both function and identity.

# Electrification solutions

We offer seamless electrification solutions for both the Pluralis™ table and the Plenum™ sofa, ensuring functionality and convenience in any workspace or hospitality setting. With integrated power outlets and charging options, these designs cater to modern needs, allowing users to stay connected whether working, collaborating, or relaxing. The electrification can be customised to suit your specific requirements, blending elegantly into the design without compromising aesthetics.

## PLURALIS™

Integrated power solutions with or without lid. Cable wells can also be added. Compatible with all Pluralis™ tables.

## PLENUM™

Integrated power unit incl. USB port (available in selected markets). Compatible with Plenum™ sofas/tables.

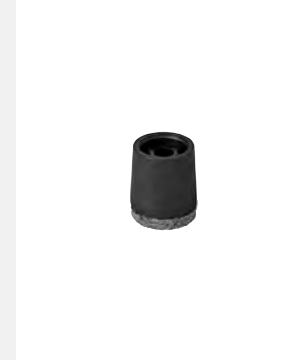

# Extras & Options

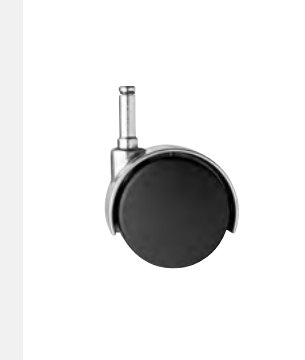

Linking devices, transport dolly and other bespoke accessories support canteen dining, conference settings, workspace design, special event seating, etc. Accessories make it simple to create efficient spaces that can be arranged and maintained easily.

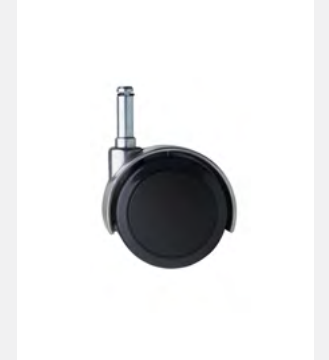

**FELT GLIDES**  
Leg ferrule with mounted felt glide. Compatible with a wide range of chairs, varies for each model.

**GLIDES**  
Large glide mounted on base. Compatible with: Oxford™.

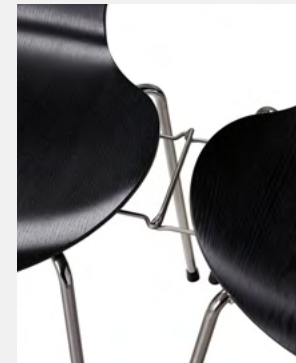

**WHEEL - SOFT FLOORS**  
Soft castor for hard floors without brake or soft castor for hard floors with brake. Compatible with a wide range of chairs with swivel base.

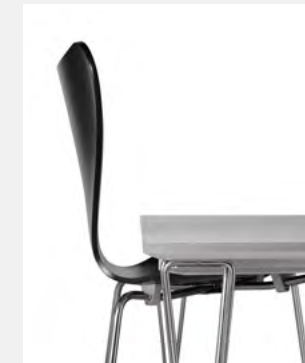

**WHEEL - HARD FLOORS**  
Hard castors for soft floors without brake or hard castor for soft floors with brake. Compatible with a wide range of chairs with swivel base.

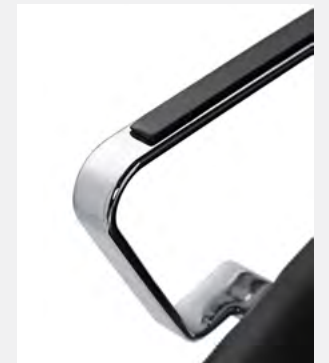

**LINKING DEVICE - SLEDGE**  
A practical and flexible solution for connecting sledge-base chairs. Compatible with: N02™ Recycle (N02-20), Vico Duo™ (VM114).

**LINKING DEVICE - SEAT**  
Designed for stability, it ensures a strong, permanent connection between chairs. Compatible with: Ant™ (3101), Grand Prix™ (3130), Series 7™ (3107, 3207).

**CHAIR RACK**  
Attachable/detachable chair rack mounted under a tabletop. Compatible with: Ant™ (3100, 3101), Grand Prix™ (3130), Series 7™ (3107).

**ARMPAD**  
For added support, optional comfort-enhancing armpads are available. Compatible with: Oxford™.

**WRITING TABLET**  
Writing tablet with fold-away option. Tabletop in coloured veneer. Compatible with: Series 7™ (3107).

**WRITING TABLET**  
Writing tablet with fold-away option. Tabletop in white laminate. Compatible with: Ant™ (3101), Grand Prix™ (3130), Series 7™ (3107, 3207).

**TRANSPORT DOLLY (SMALL)**  
Stackable chair dolly (not recommended for upholstered chairs). Compatible with a wide range of stackable chairs (the amount of chairs varies for each model).

**TRANSPORT DOLLY (LARGE)**  
Stackable chair dolly (not recommended for upholstered chairs). Compatible with a wide range of stackable chairs (the design and amount of chairs varies for each model).

# Certification overview

We are constantly working on obtaining certificates for products and materials to ensure responsible sourcing. Fritz Hansen is prioritising the use of certified materials, partnering with organisations like FSC™, PEFC, OEKO-TEX® STANDARD 100, GREENGUARD Gold, and EU Ecolabel.

Our textiles and leather come from suppliers with recognized certifications, ensuring high standards in quality, sustainability, and ethics.

The Forest Stewardship Council™ (FSC™) helps take care of forests and the people and wildlife who call them home. So you can keep your life full of forest products while keeping our forests full of life.

PEFC™ certification ensures wood is from forests that are managed with respect for sustainable, social and ethical standards.

The EU Ecolabel is a label of environmental excellence that is awarded to products and services meeting high environmental standards throughout their life-cycle: from raw material extraction, to production, use and disposal.

GREENGUARD Gold Certified products are certified to GREENGUARD standards for low chemical emissions into indoor air.

Please check this link regularly to obtain the latest product and material certification information:
